SUMMARY

Final-year Computer Engineering student with experience in Python, full-stack REST APIs, databases, and practical software projects. Seeking software engineering role.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, C++

Web: React, Node.js, Express, HTML, CSS, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Tools: Git, GitHub, Docker, Postman, Linux

EXPERIENCE

Software Developer Intern - Example Technologies

Built REST APIs and backend services for an internal project.

Improved data-processing workflow and added automated validation.

PROJECTS

Resume Insight Tool - GitHub

Developed a web application that analyzes resumes and compares them with job descriptions.

Implemented file upload, text extraction, keyword matching, and scoring features.

Task Management API - GitHub

Created a Python API with authentication, CRUD operations, and PostgreSQL integration.

EDUCATION

Bachelor of Engineering in Computer Engineering - Example Institute

2022 - 2026 | CGPA: 8.4 / 10

CERTIFICATIONS

Python Programming Certificate - Example Academy

Full Stack Web Development Certificate - Example Academy
